

Top-Quality Car Wash Soap

Welcome to Zippy's, your premier destination for top-quality car wash soap!

We take pride in being an American-owned and operated business, dedicated to providing car wash owners with the finest products available. Our premium soap is designed for every application, ensuring that you can achieve a sparkling clean car with ease. At Zippy's, we believe in efficiency, which is why our formula allows you to use less soap without compromising results. Whether you're a seasoned professional or just starting out, we are your one-stop shop for all your car wash soap needs. Join us in making car washing simpler and more effective

Super Concentrates and Ready-to-Use Concentrates

Super Concentrates

Super Concentrates – These products are 6 TIMES more concentrated than typical products that we call "RTU" (Ready to Use). These Super Concentrates can be used on direct injection systems as well as pre-mix delivery systems. Because the Super Concentrate product line provides more product per volume this allows for reduced shipping costs and reduces storage space when compared to other "RTU" products. Each Super Concentrate product is packaged into

two 2-gallon jugs with molded handles for easy pouring and handling. This product line utilizes the most economical and efficient packaging, producing the most cost-effective basis of all our product formulas.

Ready to Use Concentrate (RTU) - 30 Gallon Drum

This option provides the simplicity of swapping product containers and eliminates the process of mixing products while maintaining the proper ratio of product delivery. The 30-gallon drum format minimizes the frequency of product changes and is the recommended format for higher volume washes and high use products. As with any of our RTU products, the base product concentrates are mixed in a highly controlled factory setting to ensure the proper ratio is produced every time.

Ready to Use Concentrate (RTU) - 15 Gallon Drum

Offering the same simplicity as our 30-gallon drum product line, the 15-gallon drum option is a great compromise when space is at a premium. While maintaining the same rigorous factory controls, this option provides an advantage to products that are still in high demand but require less swap-outs than that of a 5-gallon pail.

Ready to Use Concentrate (RTU) - 5 Gallon Pail

This option offers the same simplicity as our 30 and 15-gallon drum product lines in the easy-to-handle form of a 5-gallon pail.

This product option is the best for low volume washes or products that have a lower use frequency while still providing the same rigorous factory controls as our 30 and 15-gallon drum options.
